Department of Chemistry

Late Prin. Dr. N G Zunjurwad Intercollegiate Quiz Competition in Chemistry

(For UG)

Date: 05/03/2024

It is one of the most important co-curricular activities. It is a program where the reflective answers for the questions are given. Today most of the social organizations are conducting quiz contests in different forms like Koun Banega karodpati, Bournvita competition, Mathematics Olympiad, Chemistry Olympiad, General Knowledge quiz competition etc.,

In our college we conduct ***Intercollegiate Quiz Competition in Chemistry on 5thMarch 2024*** from this year (2023-24) to foster the scientific knowledge in chemistry subject.

Importance of the Chemistry Quiz

1. To develop the spirit of participation
2. To encourage the students for wider reading
3. To develop the cooperation
4. To explore the knowledge
5. To develop the sense of searching and inquiry.
6. To Know about the development of science in the different fields.
7. It helps recognition of the bright and talent students.
8. To build a healthy competition between the students.

Organization of Chemistry Quiz

The chemistry quiz is conducted with a proper planning in the following steps.

1. Declaration of venue and dates of the written test and quiz competition.
2. There are three rounds:

Round I: A written test of 30 marks to short list the students for second round.

Round II: Quiz competition by forming 10 groups of students from student participant according their marks secured in round I.

Round III: Selecting top six groups for final competition round by their score obtained in round II.

3. Conducting Final round

4. Prize distribution.

The prizes are to be given to 4 groups of students selected in a final round including 1 consolidated prizes. The certificates are to be given to all participants. The amount for these prizes is from an interest received from the donations deposited by our past students.

Prizes for the winners of Final Round

First Prize	Rs. 1500/-, and a certificate
Second Prize	Rs. 1000/-, and a certificate
Third Prize	Rs. 750/-, and certificate

An appeal was made to the students to participate in the quiz competition by circulating quizflyer to the all colleges affiliated to the PAH Solapur University, Solapur. According to the appeal on an average 90 students (30 teams)were participated. Out of which 10 teams were short listed for theIst round. From these 6 teams were selected for final round.

Outcome:

1) It is observed that the students have developed competitive spirit and their personality.
2) It is observed that students participate in the competition with full preparation of the topics.

3) It was noticed that, students have a curiosity about the quiz.

4) Enthusiasm was noticed among the students. Students realized that they could present subjects with patience and in effective manner.

Following examiners were appointed for the competition Examiners:

1. Mr. A R Reshimkar
2. Mr. U M Kadampalle

Dear students,

On behalf of organising committee, we cordially invite you to historic place Solapur for Late Prin. Dr. N. G. Zunjurwad Intercollegiate Quiz Competition in Chemistry on Tuesday, 5th March 2024 sponsored by alumnus, beloved daughter of Late Prin. Dr. N. G. Zunjurwad, Dr. Geeta Narayan Zunjurwad. The purpose of this quiz is to inculcate the knowledge of chemistry and its popularization.

ABOUT COLLEGE :

The college is one of the oldest and biggest in this region imparting education to more than five thousand students. The college has been recognized by UGC as College with Potential for Excellence (Phase - II). College has re-accredited with 'B++' by NAAC. Our college has been awarded Ist prize in AAA and Ist prize in Campus cleaning by Solapur Municipal Corporation, Solapur. Along with the 21 undergraduate programs, the college is also running the post graduate programs in Pharmaceutical Chemistry, Physical Chemistry, Organic Chemistry, Physics, Botany, Zoology, Microbiology, Mathematics, English, Economics, History, Political Science, Hindi, Marathi and Geography. Eight research centers are approved by university in various subjects. The college is having highly dedicated and research-oriented staff. The college is running about 30 skill-oriented courses under Mahatma Anand Swami skill development centre.

ABOUT DEPARTMENT :

The chemistry department was established in 1940. The department is running PG in Pharmaceutical, Organic and Physical Chemistry. Research activities in the various topics such as high-performance materials, Organic synthesis, Medicinal chemistry, Green Chemistry, Nano-composites, Photochemistry, Environmental chemistry, Co-ordination chemistry is going on. The department is recognized research center for Ph.D. At present 13 students are working for their doctorial research and 07 students were awarded Doctoral degree. Department has completed/ongoing 10 research projects and 03 patents were patented by our faculty. Our past students are doing well in various areas in India as well as abroad. The numbers of students have qualified NET/SET/GATE examinations. The department has developed industry-college interactions. The scientists from France, Brazil, IISER Pune, NCL Pune, BARC Mumbai, and DRDO Pune etc. has visited and appreciated the departmental programs as well as activities.

Nature of Quiz :

* Total five rounds will be conducted

First Round	: MCQ based questions
Second Round	: Visual identification
Third Round	: Chemical equation challenge
Fourth Round	: Rapid fire questions
Fifth Round	: Visual chemistry encounter

Instructions :

* Maximum three participants will be allowed in one team
* One or More than one team of a college can participate
* College ID card is mandatory
* Letter regarding participation from Principal or Head is mandatory
* Participation certificate will be provided to all participants
* Limited breakfast for all participants will be provided

Team krypton - D.B.F Dayanand College, Solapur :-
Amazing experience, Fantastic quiz, As we are B.Sc I, we get such a nice knowledge about chemistry, We love it!!

Shruti Homkar — Nandini kalikotti — Dhanshri Raybole

Team Neon ⇒ D.B.F Dayanand college, Solapur,
It is very interesting, challenging, we learnt many things from this quiz. that winning or loosing is not important, most important thing is that what we actually learn from that thing, building of our personality.

Kore Pooja — Jadhavi sanjivani — Sakhale H.
Kore P.R. — Jadhavi S.S — Hipparagi Snehal

Team Helium :- D.S.T.S Mandal's college of Pharmacy, Solapur.
firstly, we express our gratitude for organising this wonderful Quiz completion. we had a fair and free atmosphere that was provided from the management who were organizing the programme. The questions were too good to improve our knowledge about the subject. Thank you once again.

A Biographical Sketch

(Biography)

Mahesh Meragu B.Sc. - I

Karoly Takacs. (21 Janury 1910-05 January 1976). The world's First shooter to win two olympic Gold Medals in the 25 meter rapid fire Pistol event, both with his left hand after his right hand was Seriously injured.

This story was of 1938, The man with his name Károly. He is from "Hungarian". And he is from that country the best pistol shooter. He Thad won all the national championship that abre held in that country. And everyone almosts conforms that 1940's olympic's are going to be held, only Karoly will get gold medal. And he was trained from years. He has only a dream, only a aim, only a focus that he had to make his hand of the World's best and best and best. And he successed in that. He made the best hand.

There was a difference of only 2 years. In 1938, A army training Camp citas gang on in his hand with whom he had to win the gold. medal a hand granade had explored. And his hand -- was gone. which was his dream, which was his foxus All the stories are ended. After that he had only 2. ways that to go and hide somewhere. or which was his goal on which he focused on what was gone to hold. "And he didn't focus on what was gone, what he didn't have, but he focused on what he had". What he had? A Left hand. There is such a hand that he can't even write. He was treated in hospital for a Month. And exactly one month later he started of training of his left hand..

After one year of training i.e. 1939 he returned. National Championship's are going on which is held in Hungary. And there were many pistol shooters there too. They all are gome and congrats to him." Károly friend, looks, this is emotion, this is Sportsman spirit, that despite all after this, you have come here to see us and to encourage us." Who didn't even know that he is training from a year of his left hand. And he replied, I have not to come here to encourage you, I have come here to Compete with you, tight with you, get ready". And Compitition has done Everyone Compitating with their best hand. And he Compitating with his only hand. Who won's? The man with the only hand károly wons..

But he never Stoped here, he had cleared his goals that has made this hand not only the Country's best but the World's best. And he focused on 1940's Olympic's which was going to held. But 1940's Olympic's was cancelled because of World War. on 1944's Olympic's Which wasgaing to held and that also Cancelled because of world war. Again cancle. And he focused on 1948's Olympic's which was held. In 1938 he had 28 years ahead of him. In 1948 he had 38 years of ahead of him. It becomes increasingly difficult to compete with youngstars who comes. But there was no word named 'difficult' in his dictonary.

He gone, there was the best Shooters are present in that competation. which they are competing with there best hand and he competating with his only hand And Who wons?

"The man with the only hand" But he never Stoped there. In 1952, Olympic's which was held. he was compate in that too. And this time gold Medal who won's? Károly. After four years again and the Whole, Rest of history Changed. of the olympics. In this perticuller Competation before of him no on of Athlete Can won the continuous 2 gold medal.

Go to any looser, he will have a list of excuses that this is why I am fail in my life. And on the other side, go to the winner, he will have a Thousands of reasons not to do what he wants to do. There is only one reason why he wants to do it and he does it.

"Hunger will always find it's way. No matter how hard it is to create the Road."

2. Brief information about the Activity	
Topic /Subject of activity	Guest Lecture on NEP 2020
Introduction of the activity	The education system aims to develop good human beings capable of rational thought and action, possessing compassion and empathy, courage and resilience, scientific temper, and 4 National Education Policy 2020 creative imagination, with sound ethical moorings and values. It aims to produce engaged, productive, and contributing citizens to build an equitable, inclusive, and plural society as our Constitution envisages. A good education institution is one in which every student feels welcomed and cared for, where a safe and stimulating learning environment exists, where a wide range of learning experiences are offered, and where good physical

	infrastructure and appropriate resources conducive to learning are available to all students. Attaining these qualities must be the goal of every educational institution. However, at the same time, there must also be seamless integration and coordination across institutions and all stages of education.
Methodology	Guest lecture with PPT presentation
Outcome of Activity	Students interacted and learned what are the actual parts of NEP

Zunjurwad Intercollegiate Poster Presentation Competition in Chemical Sciences on Tuesday, 5th March 2024 sponsored by alumnus, beloved daughter of Late Prin. Dr. N. G. Zunjurwad, Dr. Geeta Narayan Zunjurwad. The purpose of this Poster presentation is to inculcate the knowledge of chemistry and its popularization.

ABOUT COLLEGE :

The college is one of the oldest and biggest in this region imparting education to more than five thousand students. The college has been recognized by UGC as College with Potential for Excellence (Phase - II). College has re-accredited with 'B++' by NAAC. Our college has been awarded Ist prize in AAA and Ist prize in Campus cleaning by Solapur Municipal Corporation, Solapur. Along with the 23 undergraduate programs, the college is also running the post graduate programs in Pharmaceutical Chemistry, Physical Chemistry, Organic Chemistry, Physics, Botany, Zoology, Microbiology, Mathematics, English, Economics, History, Political Science, Hindi, Marathi and Geography. Eight research centers are approved by university in various subjects. The college is having highly dedicated and research-oriented staff. The college is running about 30 skill-oriented courses under Mahatma Anand Swami skill development centre.

ABOUT DEPARTMENT

The chemistry department was established in 1940. The department is running PG in Pharmaceutical, Organic and Physical Chemistry. Research activities in the various topics such as high-performance materials, Organic synthesis, Medicinal chemistry, Green Chemistry, Nano-composites, Photochemistry, Environmental chemistry, Co-ordination chemistry is going on. The department is recognized research center for Ph.D. At present 13 students are working for their doctorial research and 07 students were awarded Doctoral degree. Department has completed/ongoing 10 research projects and 03 patents were patented by our faculty. Our past students are doing well in various areas in India as well as abroad. The numbers of students have qualified NET/SET/GATE examinations. The department has developed industry-college interactions. The scientists from France, Brazil, IISER Pune, NCL Pune, BARC Mumbai, and DRDO Pune etc. has visited and appreciated the departmental programs as well as activities.

Nature of Presentation

* Total two rounds will be conducted

First Round : Display of Poster
Second Round : Oral Presentation of selected participants / team
(Note - 7 minutes for oral presentation and 2 minutes for discussion)

Themes for Poster

1) Organic Chemistry
2) Inorganic Chemistry
3) Physical Chemistry
4) Medicinal Chemistry
5) Pharmaceutical Chemistry
6) Analytical Chemistry
7) Polymer Chemistry
4) Material Chemistry

Instructions :

* Maximum two participants will be allowed in one team
* One or More than one team of a college can participate
* College ID card is mandatory
* Letter regarding participation from Principal or Head is mandatory
* The poster size will be 1 x 1 meter

Date: 18/12/2023

The college has encouraged the faculty members to promote and rigorous involvement of the students in the research activity. Then, the notice was circulated for participation in the College Level Aavishkar. The respective code numbers were allotted to all participating students. Thereafter, the College level Aavishkar was organized on 18th December 2023 at 12.00 noon at Dayanand Velenkar Hall. The College level Aavishkar was inaugurated in the hands of Prof. Dr. V. P. Ubale (Administrator Dayanand Institute, Solapur), Principal Prof. B. H. Damji and Dr. S. P. Deshmukh (Aavishkar Coordinator) and external examiner Dr. Survase. After inauguration in the introductory speech Dr. S. P. Deshmukh has explore the Aavishkar theme and its need for the society. He also reveals how the research work changes our lives in the day-to-day life. Afterwards, Principal Prof. B. H. Damji has put their views on hands on experiment of UGand PG and PPG students and these experiments can lead towards solving societal problems. Subsequently, Prof. Dr. V. P. Ubale Administrator, explained need of Aavishkar for enrichment of our lives. They appeal the student for active participation not only in the Aavishkar activity but also for development of intellectual property rights. In addition, the research is the continuous and never-ending process, so such event is for the promotion in the research field. So, every student should actively take participate in any research activity.

After inauguration, students were ready with their poster for the presentation. Then, internal and external examiner were assessing each category and level with their standard. We have prepared the examiner panel based on their

expertise in the respective area. For all six category and each level Prof. Dr. Mrs. L. C. Mushan, Mrs. Dr. R. G. Gawali and Prof. M. N. Jagtap have worked as an examiner. The six category such Humanities, Languages, Fine Arts etc. Commerce, Management and Law, Pure Science, Agricultures and Animal Husbandry, Engineering and Technology and Medicine and Pharmacy with UG, PG and PPG level the 70 students were participated. In each category such as Humanities, Languages, Fine Arts etc 06 students, Commerce, Management and Law category 06, Pure Science 08 students, Agricultures and Animal Husbandry 06 students, Engineering and Technology 04 students and Medicine and Pharmacy 08 students were selected. Total 39 students are ready to participate in the University level Aavishkar. For the smooth conduct of college level aavishkar Dr. S. P. Deshmukh, Dr. R. N. Jadhav, Dr. C.V. ❖ Introductions

Every living organism requires nutrients for their growth and other metabolic activities. For their survival, they follow a mode of nutrition. We humans and animals depend on plants for nutrients. Plants have an autotrophic mode of nutrition where they prepare their own food and obtain their nutrients via photosynthesis. The soil is not fertile enough to provide essential macro and micronutrients to plants in sufficient quantity.Hencethey need another source of nutrition. Manures andfertilizers are the alternatives used in agriculture for this purpose.Manures are the natural source of nutrients obtained from cow dung, leaves, human excreta,
and other wastes. Fertilizers are commercial products available in different forms like solid, gas or liquid. Both manure and fertilizers contain salts and organic chemicals which consist of essential plant nutrients such as nitrogen, potassium, phosphorus in known concentrations

They make soil fertile and provide nutrients to plants for better growth and higher yield. Unlike manures, fertilizers are very expensive and are used in large amounts in farming fields. As a part of crop production management, farmers largely depend on fertilizer.

But constant use of it may lead to infertility of soil and pollution. During over-irrigation, fertilizers get washed along with excess water and are unavailable for absorption by plants which cause water pollution. Also, replenishment of organic substances in the soil getaffected and microbes will be harmed due to clogging of fertilizers in the soil. Sometimes fertilizers cause various plant diseases. Therefore, the amount and frequency of their use need to be checked and controlled. It should always be optimum

❖ PURPOSE:

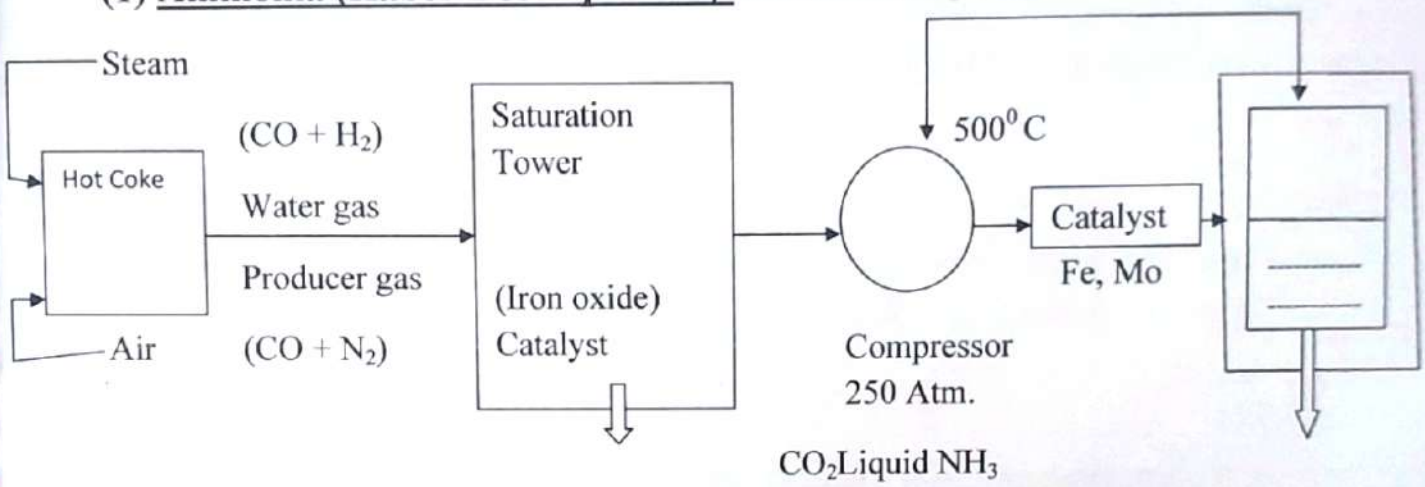
To findout the manufacturing process and uses of different types of fertilizers to grow healthy crops full of nutrients, farmers needto ensure they have healthy soil. Without fertilizers,nature struggles to replenish the nutrients in the soil.A balanced nutrient supply from the soil is thefoundation to help large populations avoid nutrientdeficiency related health problems.

❖ Aim:

To find out manufacturing process and uses of different types of fertilizers, for study purpose.

❖ Manufacturing process of fertilizers

(1) Ammonia (Haber-Bosch process): Uncombined $N_2 + H_2$



(i) Air and steam are passed over red hot coke to produce a mixture of water gas (Co + H_2) and producer gas (CO + N_2) which are the main source of hydrogen and nitrogen, respectively. Now a day Naphtha and natural gas are also used as source of H_2 and N_2 from atmosphere (Namrup, Assam).

(ii) $CO + H_2 \quad (CO_2 + H_2) \xrightarrow{\text{Iron oxide}}$

The carbon monoxide is removed by passing the mixture in to a saturation tower in the presence of **iron oxide** catalyst to convert **carbon monoxide** to **carbon dioxide.**

(iii) The resultant CO2 is removed by raising the pressure up to 250 atmospheres and by converting in solid form.

(iv) The gas mixture (N2 + H2) is adjusted to one volume of nitrogen to three volume of hydrogen, compressed to 250 atmospheres and the last traces of CO2 are removed.

(v) By raising the temperature to 5000 C and in the presence of platinized asbestos or powdered iron, the two gases united to form ammonia

$$N_2 + 3H_2 \xrightarrow[\text{Catalyst Fe, Mo}]{500^0C} 2NH_3 + 24400 \text{ cal.}$$

DDK DAYANAND COLLEGE OF ARTS & SCIENCE, SOLAPUR

Why Do Farmers Use Ammonia Fertilizers?

- Ammonia is extremely effective at delivering nitrogen to the soil to improve crop yields. Some crops require higher nitrogen than others – including wheat, corn and soybeans. These crops are quite prominent in the Midwest region of the country.

- Ammonia as fertilizer can increase the pH levels of soil. And while farmers need to avoid soil that is too acidic, a higher pH level is generally a good thing.

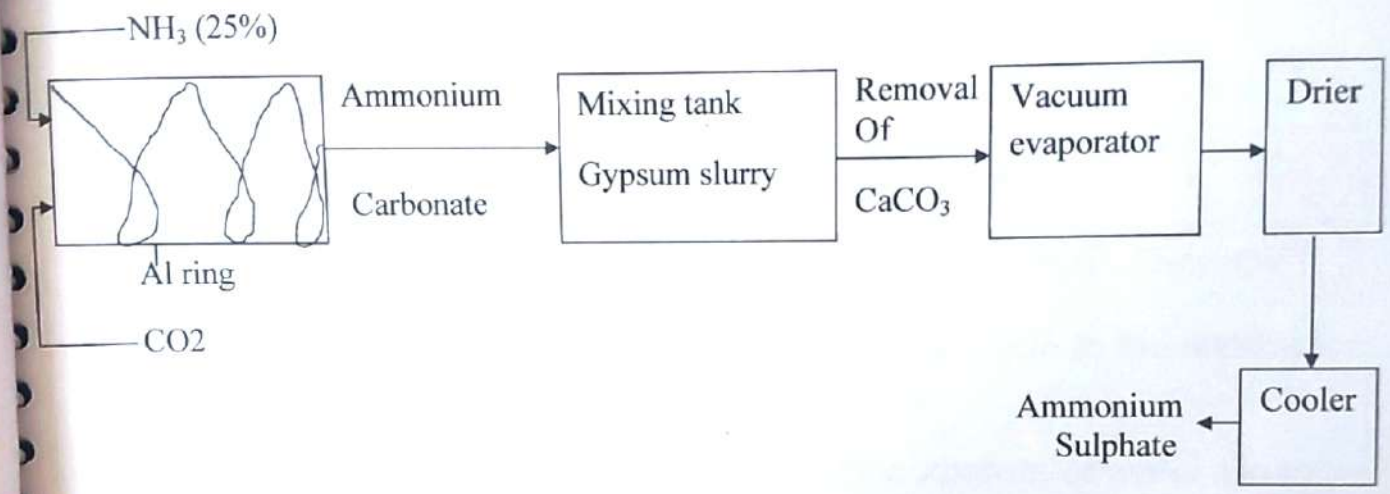
- Ammonia-based fertilizers have a positive electrical charge, they are attracted to the negatively charged soil colloids. As such, it is not as accessible to the plants. But that isn't entirely a bad thing. Because the ammonia is attached to the soil colloids, heavy rain and irrigation cannot leach the ammonia.

- ammonia-based fertilizers have a positive electrical charge, they are attracted to the negatively charged soil colloids. As such, it is not as accessible to the plants. But that isn't entirely a bad thing. Because the ammonia is attached to the soil colloids, heavy rain and irrigation cannot leach the ammonia.

- One other consideration when choosing between ammonia-based and nitrate-based fertilizers is the time of year and soil temperature. Ammonia does not do its work as effectively below 10 degrees Celsius or 50 degrees Fahrenheit.That makes ammonia fertilizers better for summer applications but not as favourable for winter applications.

DBK DAYANAND COLLEGE OF ARTS & SCIENCE, SOLAPUR

(2) Ammonium Sulphate (Gypsum process):



(i) A 25% solution of ammonia is passed into a tower with full of aluminum rings through which CO2 is bubbled and ammonium carbonate is formed.

$$2NH_3 + CO_2 + 2H_2O \longrightarrow (NH_4)_2CO_3 + H_2O$$

(ii) The ammonium Carbonate solution is mixed with a cream of calcium sulphate (Gypsum) to obtain Ammonium Sulphate.

$$(NH_4)_2CO_3 + CaSO_4 \longrightarrow (NH_4)_2SO_4 + CaCO3$$

The Calcium Carbonate is removed

D.D.S. DAYANAND COLLEGE OF ARTS & SCIENCE, SOLAPUR

(iii) The ammonium sulphate solution is concentrated in vacuum evaporators, crystals are removed by filtration, drier, cooled and sold as **Ammonium Sulphate.**

Why Do Farmers Use Ammonia Sulphate Fertilizers?

This is another type of dry granular that is popular among farmers but in areas that require both nitrogen and sulphur.

- Dry granular
- Contains 21 percent nitrogen and 24 percent sulphur
- Not an ideal source of nitrogen since the concentration is fairly low
- Leads to more acidic soil than ammonium nitrate due to the nitrification process
- When used on alkaline soils, farmers must incorporate or water it in to avoid nitrogen loss

How Does Ammonia Help Plants?

Ammonia is naturally occurring in soil, air and water. It's an essential element in photosynthesis, which is an important part of how plants grow. Therefore, nitrogen supports healthy plant growth to aid in supplying greater crop yield.

Is Ammonia a Good Fertilizer?

Ammonia is a good fertilizer because it replenishes nitrogen in the soil. Nitrogen naturally occurs in soil, but plants remove it rapidly during the growing season.

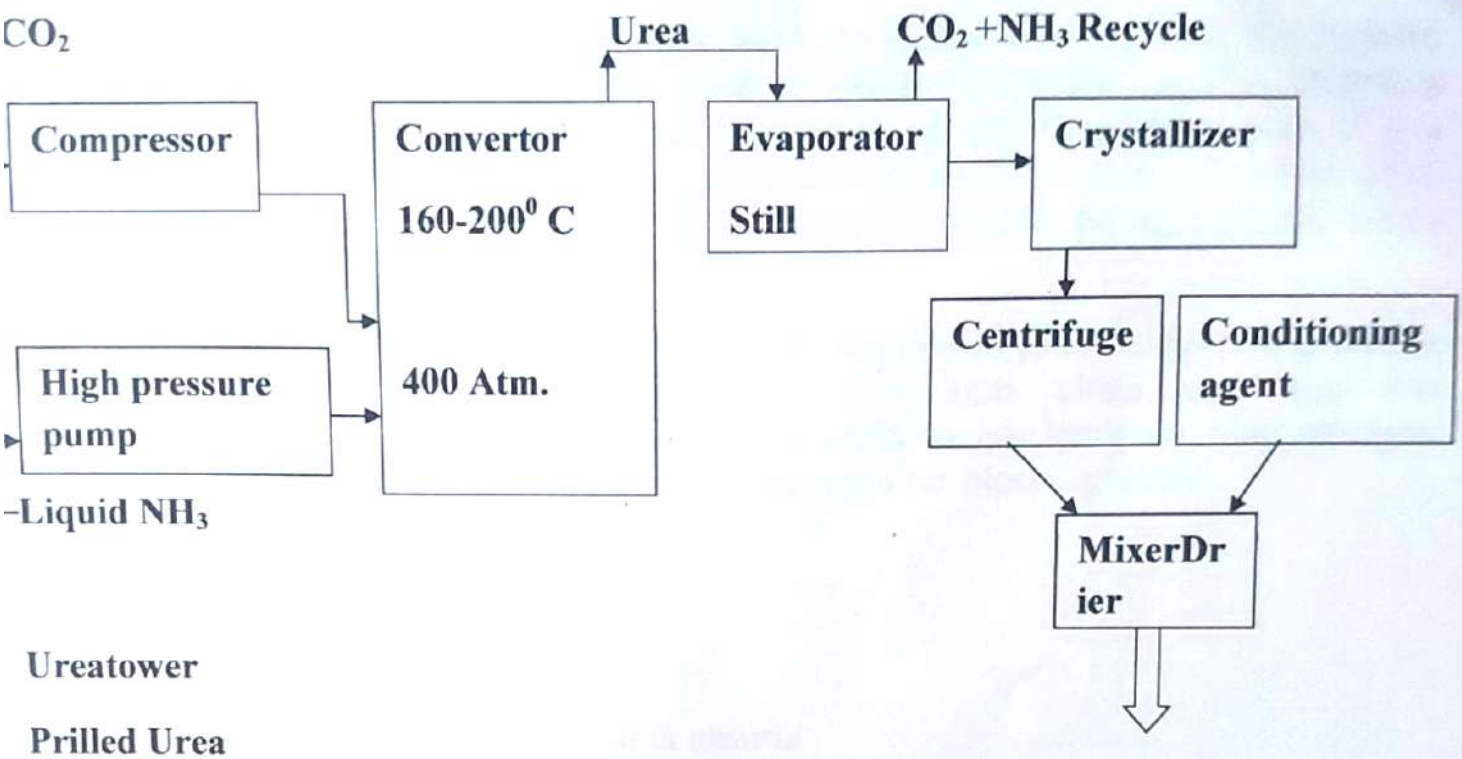
(3)Urea:



- **Reaction:**

$$2NH_3 + CO_2 \xrightarrow[400\ Atm.]{160\text{-}200^\circ} NH_2COONH_4$$

Ammonium carbamate

- **Principle:** Exo-thermic synthesis of ammonium carbamate with its subsequent dehydration to urea
- **Process:**

(i) The carbon dioxide and liquid ammonia are allowed to react in the liquid phase under greatly elevated pressure and temperature in convertor

(ii) The unreacted NH_3 and CO_2 are removed by means of evaporator still and are then recycled

(iii) Urea solution is pumped to crystallizer where cooling and crystallization takes placed.

(iv) The urea crystals are centrifuged and dried.

DR. DAYANAND COLLEGE OF ARTS & SCIENCE, SOLAPUR

Why Do Farmers Use Urea Fertilizers?

Urea is the most important nitrogenous fertilizer in the market, with the highest Nitrogen content (about 46 percent). It is a white crystalline organic chemical compound. Urea is neutral in pH and can adapt to almost all kinds of soils. It is a waste product formed naturally by metabolizing protein in humans as well as other mammals, amphibians and some fish. Urea is widely used in the agricultural sector both as a fertilizer and animal feed additive.

The main function of Urea fertilizer is to provide the plants with nitrogen to promote green leafy growth and make the plants look lush. Urea also aids the photosynthesis process of plants. Since urea fertilizer can provide only nitrogen and not phosphorus or potassium, it's primarily used for bloom growth.

Advantages of Urea Fertilizer

- Superior Nitrogen content
- Low production cost, as source is natural
- Non-flammable and risk-free storage
- Wide application range, for all types of crops and soils
- Neutral pH and harmless to crops and soil

How to Use Urea Fertilizer?

- Urea should be applied at the time of sowing. It should not come in contact with the seeds. It also can be applied as a top dressing.
- Since Urea is highly Nitrogen-concentrated, it should be used in combination with earth or sand before its application.
- Urea should not be applied when the soil contains free water or likely to remain wet for three or four days after application.

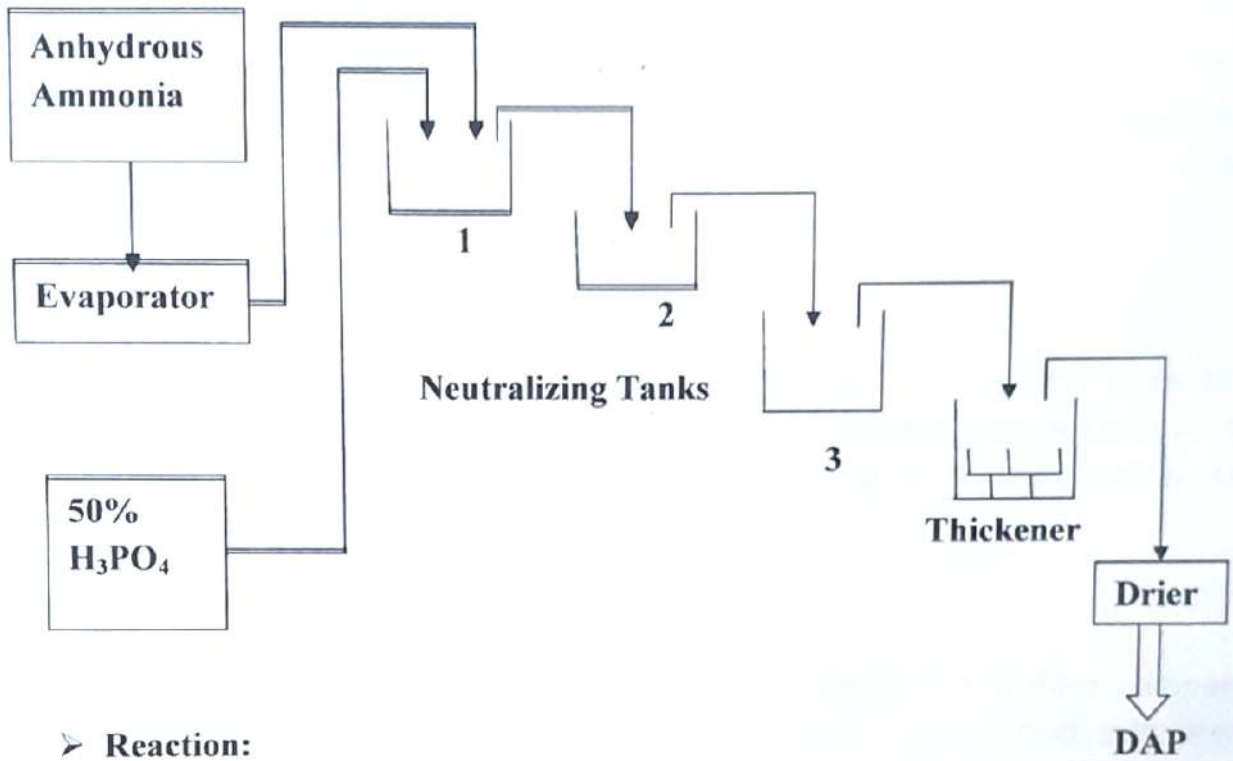
(4) Diammonium Phosphate (DAP):



➢ **Reaction:**

$$2NH_3 + H_3PO_4 \longrightarrow (NH_4)_2 HPO_4$$

Ammonia OPA DAP

➢ **Process:**

(i) DAP is manufactured by mixing excess quantity of ammonia with phosphoric acid. The phosphoric acid first synthesized from rock phosphate and the crud phosphoric acid is used for the manufacturing of DAP

(ii) The reaction is carried out in a series of agitator (neutralizing tanks) lined with acid proof bricks and lead.

D.A.V. DAYANAND COLLEGE OF ARTS & SCIENCE, SOLAPUR

(iii) The resultant slurry becomes pasty and crystallizes to an almost solid mass on cooling.

(iv) The product is dried, granulated and sold as **Diammonium Phosphate (DAP)**

Why Do Farmers Use Diammonium Phosphate Fertilizers?

- **High Nutrient Content:** DAP is a fertilizer that contains high levels of nitrogen and phosphorus, two essential nutrients for plant growth. The nitrogen in DAP helps plants develop strong stems and leaves, while the phosphorus promotes root development and overall plant health.

- **Increased Crop Yield:** Using DAP fertilizer can significantly increase crop yields by providing plants with the necessary nutrients they need to grow and thrive. This results in healthier, more robust plants that are better able to resist disease and pests.

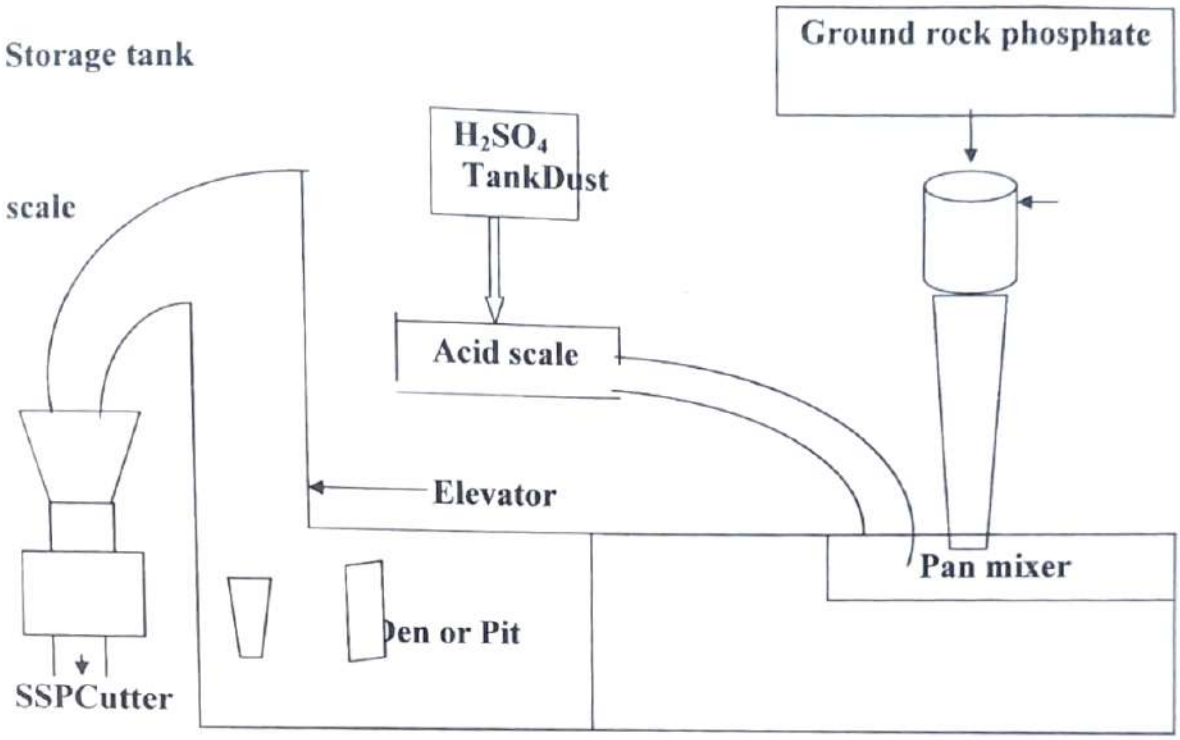
- **Cost-Effective:** DAP fertilizer is an affordable option for farmers compared to other fertilizers. This is because it contains high levels of nutrients, meaning less fertilizer is required to achieve the desired results.

- **Versatile:** DAP fertilizer can be used on a variety of crops, including cereals, legumes, vegetables, and fruits. This makes it a versatile option for farmers who grow multiple crops.

- **Easy to Store and Transport:** DAP fertilizer is easy to store and transport as it is a dry, granular material. This makes it a convenient option for farmers who need to transport large quantities of fertilizer to their fields.

D.B.S. DAYANAND COLLEGE OF ARTS & SCIENCE, SOLAPUR

(5) Single Super Phosphate (SSP):



- **Reaction:**

  $3Ca_3(PO_4)2CaF_2 + 7H_2SO_4 \longrightarrow 3Ca(H_2PO_4)_2 + 7CaSO_4 + 2H_4$

- **Principle:** Rock phosphate is treated with sulphuric acid to convert the insoluble and unavailable tricalcium phosphate to available monocalcium phosphate

- **Process:**

  (i) The calculated quantity of sulphuric acid and 4 mesh ground rock phosphate are introduce and mixed very thoroughly then dropped in den or pit

  (ii) The mixture is allowed for 24 to 35 hours for reaction in pit. There is a loss of volume by 10 % due to escape of water, CO2 and florin compounds. Temperature is rise to 100^0 C

  (iii) The product is dried and ground to very fine powder and stored for sufficient time for curing of material, then granulated and sold as **single Super Phosphate (SSP)**

D.B.N. DAYANAND COLLEGE OF ARTS & SCIENCE SOLAPUR

Why Do Farmers Use Single Super Phosphate Fertilizers?

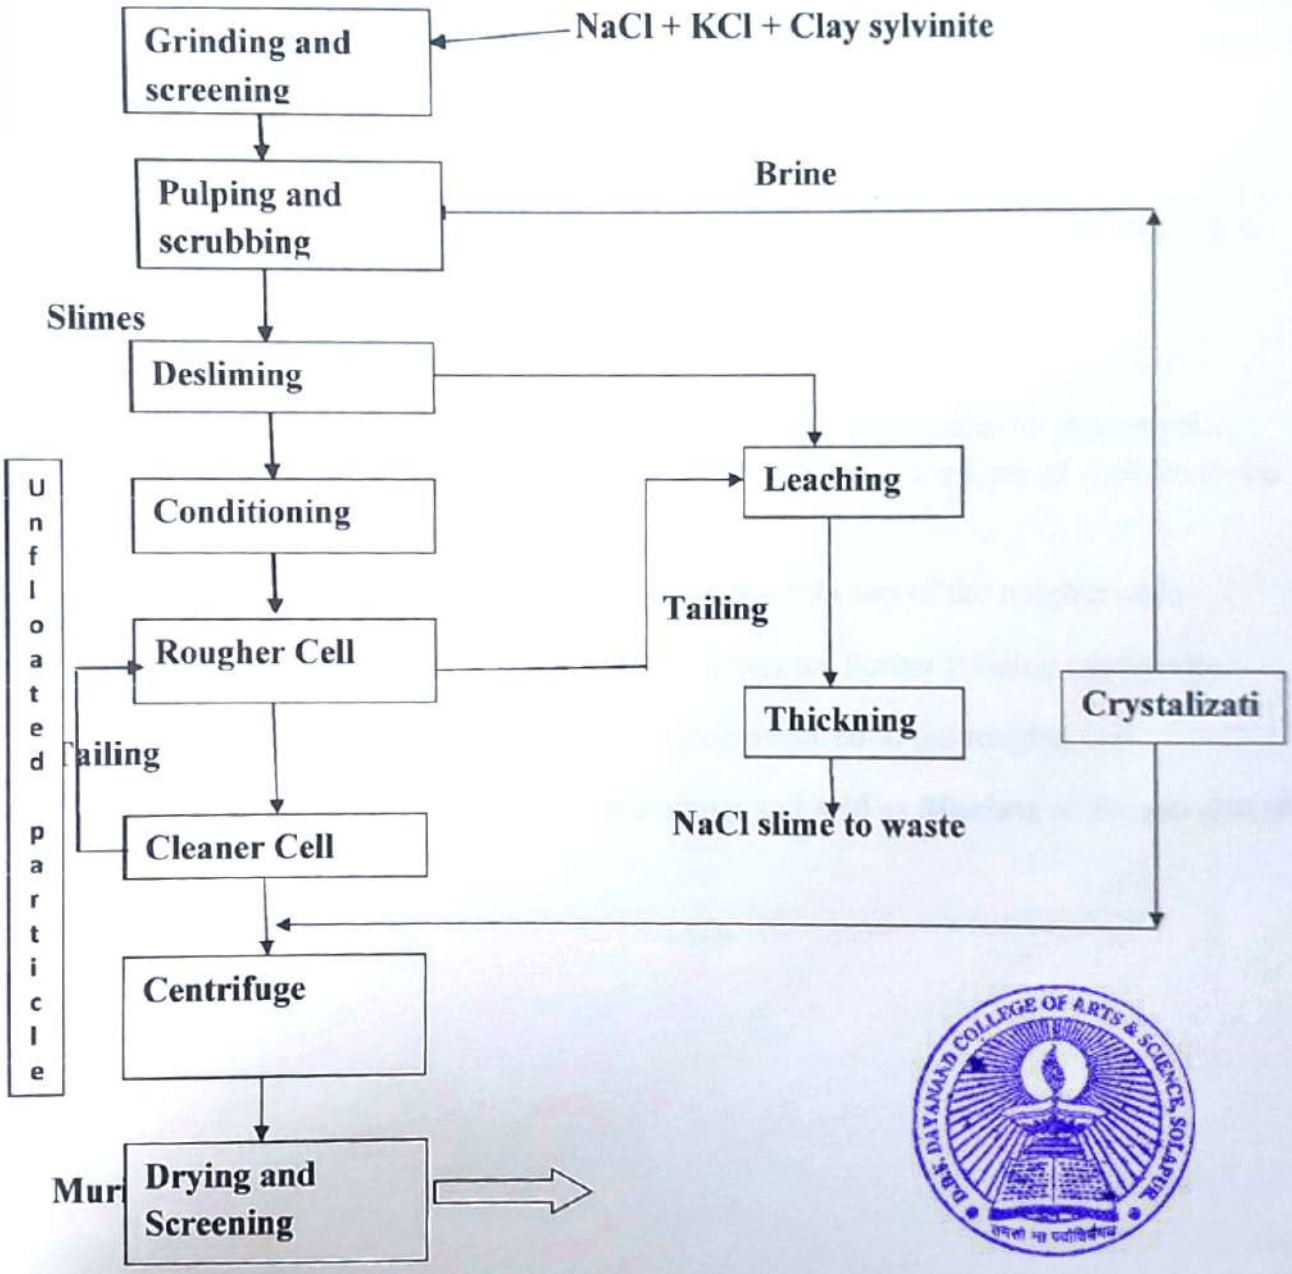
- **It has a high phosphorus content**SSP fertilizer is rich in phosphorus, a vital nutrient for plant growth and development. It contains 16% of phosphorus, which is a great quantity. As we all know, phosphorus is important for optimal root development, early plant establishment, and the production of flowers, fruits, and seeds. When the crop is getting enough phosphorus, the overall plant health and productivity of the crop improve.

- **It releases nutrients immediately** Unlike many commercial fertilizers that release nutrients immediately, SSP fertilizer releases nutrients slowly ensuring that the crop is getting crucial growth components over time. Such sort of nutrient release promotes a balanced growth of crops.

- **It supplies enough secondary nutrients to the crop**Other than phosphorus, SSP fertilizer contains a rich amount of sulphur and calcium nutrients as well. Sulphur is crucial for various metabolic processes, enzyme activation, and protein synthesis in plants while Calcium supports cell wall formation, cell division, and overall plant structure

DBK. DAYANAND COLLEGE OF ARTS & SCIENCE SOLAPUR

(6)Muriate of Potash (KCl):



D.B.S. DAYANAND COLLEGE OF ARTS & SCIENCE, SOLAPUR

- **Principle:** This process isbased on differences in specific gravity of KCl (1,988) and NaCl (2.164). KCl having lesser specific gravity floats on top of NaCl.

- **Process:** This method of refining is the most widely practiced and the most economical method of recovering Sylvite (KCl) from Sylvinite (Mixture of KCl, NaCl & clay). The major steps in floatation process are as under.

(i) Crushing and screening.

(ii) Adding a saturated brine of NaCl and KCl to produce a pulp containing 50 to 70 % solid.

(iii) Wet grinding and removal of slimes.

(iv) Introducing the Sylvite containing brine in to a series of rougher floatation cells, providing agitation and introducing air which adheres in the form of bubbles to the surface.

Floatation concentrate is harvested from the top of the rougher cells.

(v) It is introduced in to the cleaner floatation circuit for further refining the Sylvite.

(vi) The unfloted particles from the cleaner circuitrecurred to the rougher cell.

(vii) Drying in rotarydrier, screening and begging and sold as **Muriate of Potash (MOP)**

Why Do Farmers Use Muriate Of Potash Fertilizers?

- **Enhanced Yield Potential:** MOP's targeted potassium supply promotes flowering, fruiting, and overall crop development, contributing to increased yields and improved crop quality.

- **Stress Resistance:** Potassium is known for enhancing a plant's ability to withstand environmental stresses, such as drought and disease. MOP strengthens plants, promoting resilience in adverse conditions.

- **Sustainable Agriculture:** By supporting optimal plant nutrition and soil health, MOP contributes to sustainable agricultural practices, ensuring long-term productivity and environmental stewardship.

- Invest in the growth and vitality of your crops with our Soluble Muriate of Potash (MOP) Fertilizer – the key to unlocking agricultural excellence and maximizing your harvest potential.

- Protects against draught by maintaining plants water content which in turn is a benefit for photosynthesis as leaf's maintain their shape / vigor.

- Potash plays a vital role in the production of proteins and sugars

DR. DAYANAND COLLEGE OF ARTS & SCIENCE, SOLAPUR

❖ Conclusion:

The analysis of fertilizers plays a critical role in modern agriculture, as it allows for the optimization of cropproductivity, the preservation of environmental sustainability, and the informed decision-making regardingfertilizer application. Throughout this project, we have into the process of fertilizer analysis andemphasized its significance in the realm of agriculture.

By conducting thorough analyses of fertilizers, we gain valuable insights -intotheir composition, nutrientcontent, pH levels, moisture content, and potential contaminants. These insights enable farmers andagricultural professionals to make informed decisions about the type, quantity, and timing of fertilizerapplication, maximizing crop yields while minimizing environmental impact.

Furthermore, fertilizer analysis helps ensure that plants receive the necessary nutrients for healthy growthpreventing nutrient deficiencies or toxicities that can hinder their development. By understanding thenutrient composition of fertilizers and matching them with the specific requirements of different crops,farmers can optimize nutrient uptake and promote robust plant growth

In addition to its impact on crop productivity, fertilizer analysis promotes sustainable agricultural practices.By accurately analyzing fertilizers and determining their nutrient content, farmers can prevent excessive andwasteful fertilizer application. This reduces the risk of nutrient runoff into water bodies, minimizingenvironmental pollution and protecting aquatic ecosystems, Responsible fertilizer use, guided by analysis

results, contributes to the conservation of natural resources and supports long-term environmentalsustainability.
